

Ensuring broadcasts are never lost in translation.

Media Management Services for Broadcasters

Media management services & solutions

Trusted, efficient media operations

Making content suitable from a technical, editorial, regulatory and cultural perspective is a media industry must. TVT works with broadcasters globally to deliver a full suite of media management services, ensuring the correct variants and packages of content and ancillary assets are created and delivered on time and to the exact specification.

TVT manages 5,000 input assets a week, processing them into over 40 linear channels, plus content packages for various VOD and mobile platforms. TVT's ContentSelect coordinates content acquisition, language and access service providers, working with in-house compliance and versioning services to create and package content in multiple territories, all conforming to editorial and regulatory requirements. TVT's secure, cloud-based content management workflow software and state-of-the-art media post production facilities can scale to meet any broadcaster requirements.

Flexible, experienced and fully integrated

TVT's scale and workflow expertise provides broadcasters with cost-efficient delivery models, with an end-to-end service or individual workflow stages to meet individual requirements. Managed services allow customers to focus on their core business, trusting TVT to oversee volume fluctuations and seasonality. TVT's broadcast management system experience mitigates the risks of a complex media management outsourcing project and ensures a seamless on-boarding service.

Transparency and confidence

ContentSelect provides stakeholders with a secure dashboard offering a real-time view of all content status at every stage of the workflow, delivering transparency, auditability and customer confidence that content is being created, prepared and delivered on time, all the time.
