

Delivering secure content the world over.

Global Experts in Media Management

Media management services & solutions

Any content, any format, any platform delivered on time, every time

As the global expert and trusted partner in secure, efficient media management and processing of content, TVT manages over 5,000 assets every week, delivering transmission-ready content for linear and VOD, complied, localised and packaged with the correct ancillary assets and enhanced metadata.

A secure, cloud-based content management workflow software, state-of-the-art media post production facilities and expert team ensures that TVT can scale to meet any requirements.

TVT difference

TVT's innovative software, ContentSelect, efficiently manages bespoke and complex digital workflows. A secure dashboard offers customers a real-time view of all content status at every stage of the workflow, giving them confidence that their content is being processed and delivered correctly and on time.

By minimizing operational overheads, customers are free to focus on commercial activities, while TVT does the media processing heavy lifting.

TVT services

Broadcasters TVT reduces operating costs through the use of efficient workflows and scalable operations to provide services from content acquisition coordination, compliance and versioning editing, coordination with language and access service vendors, metadata management and delivery to linear layout and VOD platforms.

VOD Platforms TVT's media preparation, management and packaging services ensure a scalable and swift response to fluctuating demand for VOD content whilst maintaining the highest levels of quality.

Rights Owners TVT provides a full media management and delivery service, ensuring that programme sales are fulfilled, and offering additional features including branded web portals to support sales and marketing activities.

Archive Owners TVT provides digitisation solutions along with editorial and restoration options to enable preservation of historic materials, and enables file based browse, access and delivery methods, all backed up by a powerful library cataloguing and search platform to facilitate future commercial exploitation.
